

**FITXA D'ADDENDA DE LA GUIA DOCENT - FICHA DE ADENDA A LA GUÍA DOCENTE  
TEACHING GUIDE ADDENDUM FORM**

<b>Codi d'assignatura</b> <i>Código de asignatura</i> <i>Course code</i>	M9 (44425)
<b>Nom d'assignatura</b> <i>Nombre de asignatura</i> <i>Course name</i>	M9. Molecular nanomagnetism and spintronics
<b>Titulació/Titulación/Degree</b>	Master in Molecular Nanoscience and Nanotechnology
<b>1. Contenido /Contingut/ Content</b>	
Contents initially included in the teaching guide are maintained.	
<b>2. Volum de treball i planificació temporal de la docència</b> <b>2. Volumen de trabajo y planificación temporal de la docencia</b> <b>2. Workload and teaching time planning</b>	
<b>3. Metodología docente / Metodología docente/ Teaching Methodology</b>	
<p>The workload of different teaching activities (theory classes, seminars and tutorials) is maintained.</p> <p>The <b>theory classes</b>, which should have been taught intensively in Valencia during two weeks, are being recorded as a slide show with narration. This material will be available to students in a e-learning platform (Moodle (Aula Virtual) or MS Teams) before May 10th. Students will be informed how to access these classes.</p> <p>All these lessons have a <b>seminar</b> part, which is planned to be given online by each professor using the common videoconference programs available in the participating universities (Blackboard collaborate, Teams, Zoom, etc.). This seminar part includes solving practical problems, questions and student doubts related to the subject. The attendance to these online videoconferences will be compulsory for all master students and will be recorded and uploaded in the e-learning platform. This part will be tentatively scheduled during the last week of May (from 25 to 29 May) and the first week of June (from 1 to 5 June). The students will be informed about the time schedule for these online seminars with at least 7 days in advance (i.e., before May 18).</p> <p>Finally, person to person <b>tutorials</b> to answer questions / doubts will be available as in previous years through telephone, E-mail and, additionally, through chats in the e-learning platform.</p>	
<b>4. Avaluació/Evaluación/ Evaluation</b>	
<p>Given that this exam will be carried out by small groups of students in each university (maximum of 14 students in the University of Valencia) and they have been delayed to July, it will be attempted to do it "in person". If the face-to-face examination would not be possible, it will be carried out telematically using the e-learning platform videoconference.</p> <p>'Questions answering' and 'Attendance and active participation in seminars' will be evaluated during the online seminars.</p> <p>New exam date: ORDINARY: Monday, July 6, 2020 at 10:00 (9:00 in Canary Islands) EXTRAORDINARY: Monday, July 20, 2020 at 10:00 (9:00 in Canary Islands)</p> <p>Students will be informed with at least 10 days in advance (i.e. before June 26<sup>th</sup>) if the exams will be done in-person or telematically.</p>	

## **5. Bibliografía/Bibliografía/Bibliography**

Some of the recommended bibliography is available online. In case a student wants more detailed information on a specific topic, professors will provide it through scientific articles (to which the Universities are subscribed or published with open-access), doctoral PhD theses in public repositories, etc.
