Model building

PUBLICATIONS

Arnold, B. C., Castillo, E., and Sarabia, J. M. (1999). Conditional specification of statistical models. Springer.

Arnold, B. C., Castillo, E., and Sarabia, J. M. (2001). Conditionally specified distributions: an introduction (with comments and a rejoinder by the authors). *Statistical Science*, 16(3):249–274.

Arnold, B. C. and Wesolowski, J. (1997). Multivariate distributions with gaussian conditional structure. *Stochastic Processes and Functional Analysis*, pages 45–59.

Athanassoulis, G. A., Skarsoulis, E. K., and Belibassakis, K. A. (1994). Bivariate distributions with given marginals with an application to wave climate description. *Applied Ocean Research*, 16:1–17.

Bitner-Gregersen, E. M. and Haver, S. (1989). Joint long term description of environmental parameters for structural response calculation. In *Proceedings of the Second International Workshop on Wave Hindcasting and Forecasting*, Canada.

Buckingham, E. (1915). The principle of similitude. *Nature*, 96:396–397.

Castillo, E., Grande, Z., Mora, E., Lo, H. K., and Xu, X. Complexity Reduction and Sensitivity Analysis in Road Probabilistic Safety Assessment Bayesian Network Models. *Computer Aided Civil And Infrastructure Engineering*, 32, 546—561.

Castillo, E., Grande, Z., Mora, E., Xu, X., and Lo, H. K. Proactive, Backward Analysis and Learning in Road Probabilistic Bayesian Network Models. *Computer Aided Civil And Infrastructure Engineering*, 32, 820—835.

Castillo, E., Fernández-Canteli, A. and Siegele, D. Obtaining S-N Curves from Crack Growth Curves: an Alternative to Self-Similarity. *International Journal of Fracture*, 187:1, 159–172, 2014.

Castillo, E., Calviño, A., Nogal, M., and Lo, H. K. (2014). On the probabilistic and physical consistency of traffic random variables and models. *Computer Aided Civil and Infrastructure Engineering*, 29, 496–517, 2014.

PUBLICATIONS

E. Castillo, A. J. O'Connor, M. Nogal and A. Calviño. On the physical and probabilistic consistency of some engineering random models. *Structural Safety*, 51:1–12, 2014.

E. Castillo, A. Calviño, M. Nogal and H. K. Lo. On the Probabilistic and Physical Consistency of Traffic Random Variables and Models. *Computer Aided Civil and Infrastructure Engineering*, 29, 496–517, 2014.

Castillo, E., Jiménez, P., Menéndez, J., and Nogal, M. (2013). A Bayesian method for estimating traffic flows based on plate scanning. *Transportation*, 40:173–201.

Castillo, E., Nogal, M., Menéndez, J., Sánchez-Cambronero, S., and Jiménez, P. (2012). Stochastic demand dynamic traffic models using generalized beta-gaussian Bayesian networks. *IEEE Transactions on Intelligent Transportation Systems*, 13(2):565–581.

Castillo, C., Castillo, E., Fernández-Canteli, A., Molina, R. and Gómez, R. A Stochastic Model for Damage Accumulation in Rubble-mound Breakwaters Based on Compatibility Conditions and the Central Limit Theorem. *ASCE's Journal of Waterway, Port, Coastal, and Ocean Engineering*, 138:6, 451–463, 2012.

E. Castillo, A. Fernández-Canteli, C. Castillo and C. Mozos. A New Probabilistic Model for Crack Propagation Under Fatigue Loads and its Connection with Wöhler Fields. *International Journal of Fatigue*, 32:4, 744–753, 2010.

C. Castillo, A. Fernández-Canteli, E. Castillo and H. Pinto. Building models for crack propagation under fatigue loads: application to macrocrack growth. *Fatigue and Fracture of Engineering Materials and Structures* 33, 619–632, 2010. DOI: 10.1111/j.1460-2695.2010.01475.x

E. Castillo, A. Fernández-Canteli, R. Koller, M. L. Ruiz Ripoll and A. García. A Statistical Fatigue Model Covering the Tension and Compression Wöhler Fields. *Probabilistic Engineering Mechanics*, 24, 199–209, 2009.

PUBLICATIONS

E. Castillo and A. Fernández-Canteli. A Unified Statistical Methodology for Modelling Fatigue Damage. ISBN: 978-1-4020-9181-0. Springer, 2009.

E. Castillo and A. Fernández Canteli. Una Metodología Estadística Unificada para Modelar el Daño a Fatiga. Monografías de la Academia de Ingeniería, Vol. 5, 2009. ISBN: 978-84-95662-27-9.

Grande, Z., Castillo, E., Mora, E., and Lo, H. K. (2017). Highway and Road Probabilistic Safety Assessment Based on Bayesian Network Models. *Computer Aided Civil And Infrastructure Engineering*, 32, 379—396.

R. Koller, M. L. Ruiz Ripoll, A. García, A. Fernández-Canteli and E. Castillo. Experimental Validation of a Statistical model for the Woehler Field Corresponding to any Stress Level and Amplitude *International Journal of Fatigue*, 31, 231–241, 2009.

E. Castillo, A. Fernández-Canteli, H. Pinto and M. L. Ruiz Ripoll. A statistical model for crack growth based on tension and compression Wöhler fields. *Engineering Fracture Mechanics*, 75, 4439-4449, 2008.

E. Castillo, A. Ramos, R. Koller, M. López Aenlle and A. Fernández-Canteli. A Critical Comparison of Two Models for Assessment of Fatigue Data, *International Journal of Fatigue*, 30:1, 45–57, 2008.

E. Castillo, A. Fernández-Canteli and M. L. Ruiz Ripoll, A General Model for Fatigue Damage due to any Stress History, *International Journal of Fatigue*, 30:1, 150–164, 2008.

E. Castillo, A. Fernández-Canteli, H. Pinto and M. López Aenlle. A general regression model for statistical analysis of strain-life fatigue data, *Materials Letters*, 62, 3639–3642, 2008.

E. Castillo, A. Fernández-Canteli, A. S. Hadi and López Aenlle, M. A fatigue model with local sensitivity analysis. *Fatigue and Fracture of Engineering Materials and Structures*, 30, 149–168, 2007.

PUBLICATIONS

E. Castillo, A. Fernández-Canteli, M. López Aenlle and M. L. Ruiz Ripoll. Some Fatigue Damage Measures for Longitudinal Elements Based on the Wöhler Field. *Fatigue and Fracture of Engineering Materials and Structures*, 30, 1063–1075, 2007.

E. Castillo and A. Fernández-Canteli. A parametric lifetime model for the prediction of high cycle fatigue based on stress level and amplitude. *Fatigue and Fracture of Engineering Materials and Structures*, 29, 1031-1038, 2006.

Castillo, C., Mínguez, R., Castillo, E., and Losada, M. (2006). An optimal engineering design method with failure rate constraints and sensitivity analysis. application to composite breakwaters. *Coastal Engineering*, 53(1):1–25.

E. Castillo, A. S. Hadi, N. Balakrishnan, and J. M. Sarabia. Extreme Value and Related Models with Applications in Engineering and Science, Wiley Series in Probability and Statistics, Wiley, 2005. ISBN: 0-471-67172-X.
