

AIRCRAFT MAINTENANCE TECHNICIAN

Job requirements:

- Aircraft maintenance technician with LMA licence (B1.3 or B1.4 or B1.2).
- Minimum of two years' experience in helicopter maintenance, with the ability to perform independently any task within their speciality.
- B1 level of English or equivalent.
- Proficiency in Microsoft 365 (Word, Excel, Access).
- Use of online maintenance manuals.

Merits to be assessed:

- B2 licence.
- Other official qualifications recognised by the Ministry of Education (UAS or manned aircraft) and/or Part 147.
- Training in:
 - A1/A3 and STS-02 (or STS-ES-02) remote UAS pilot certifications.
 - Aircraft type and component technical courses.
 - Schiebel CAMCOPTER S-100 aircraft maintenance.
 - Special Operations courses (SPO).
 - Training in UAS pilot requirements under operational authorisations
- Experience in:
 - Recent experience in manned and/or unmanned aircraft maintenance (preferably piston-engine aircraft).
 - Maintenance of reciprocating engines and other components.
 - Avionics maintenance.
 - Part 145 or CAO maintenance organisations.
 - UAS flights (multirotor and/or helicopters).

Duties:

Performing maintenance tasks (line and base) on unmanned aircraft (helicopters and multicopters). Certifying maintenance tasks previously performed. Managing maintenance documentation at the base of operations (records, maintenance manuals, organisation manuals, etc.). Applying 145 standards to aircraft and components. Control of aircraft airworthiness, including, among other, maintenance tasks and component inspection. Warehouse management and purchase orders issuing.

Working hours: Flexible. The service will be provided at the Gran Canaria operational base of El Berriel.

Interested candidates may send their CV to the following email address: seleccion@senasa.es indicating in the subject line: AIRCRAFT MAINTENANCE TECHNICIAN (100-25)
